Port Phillip Bay Fishing Guide Service with Charlie Micallef

For those who love their fishing but are constantly frustrated because they come up empty handed every time on the fishing trip , ever thought of using a Fishing guide?

If the answer is yes well this is where savage seas adventures can help you!

Port Phillip Bay

The southern end of Port Phillip Bay holds many species of fish this is one of the areas that Charlie Micallef loves to fish it can be a very rewarding part of Port Phillip Bay with its beautiful clean clear water

After deciding that you wish to take a **Savage Seas Adventures**, Charlie Micallef will discuss with you on what particular species you wish to learn and catch, all the requirements on your boat safety equipment and, most importantly the date you wish to experience fishing with Savage Seas Adventures.

One week before the day of your trip Charlie Micallef will contact you and discuss whether your trip will go ahead or cancelled due to poor weather and rescheduled for another day.

What's included in your Guide

- **All fishing gear supplied**

As part of your **Savage Seas Adventure** all fishing gear, rods and reels, lines, sinker's and hooks are all supplied, this is important as your trip is designed to teach you all the techniques and the proper way to use your gear

- **Your personalised DVD (you are the star)**

There is nothing better than sitting back at home and watching your **Savage Seas Adventures on your own TV**. The entire day of your fishing trip is filmed on a high-definition camera and features you, your family, or your friends in action.

Things that are filmed will include launching and receiving your boat, footage of interior of your boat whilst on the water and of course hopefully you or your family or friends finding a fish of a lifetime. Your personalised DVD will run for approximately 1 hour enough time to capture all the highlight of the day.

- **Top-Quality Photos**

Also included in this package are still photos that can also be played on your family DVD, the camera used is of high quality, and is the same equipment used by Charlie Micallef in all he's media reports
